compute\_canonical\_form  
\_type5\_fastest

compare\_matrices

```
graph LR; A[compute_canonical_form_type5_ct] --> C[compare_matrices]; B[compute_canonical_form_type5_fastest] --> C;
```

The diagram illustrates a flow where two separate functions, 'compute\_canonical\_form\_type5\_ct' and 'compute\_canonical\_form\_type5\_fastest', both point to a single function named 'compare\_matrices'. The arrows are blue and originate from the right side of the left boxes, pointing towards the left side of the right box.
